Date: December 1, 2010 (Wednesday), 11:00 - 12:25

Place E-201 (Hiroshima), 3rd fl. meeting room (Nagasaki) (teleconference)

<Epidemiological research review >

	Department	Research project title	Review results	Summary
1	Statistics	Methods for Assessing Joint Effects of Radiation and Intermediate Risk Factors in Nested Case Control Studies	Approved	<ul style="list-style-type: none">◆Item I-14 (Methods of personal information protection) of the application document indicates “linkable anonymization,” but “unlinkable anonymization” should be chosen. The RP should be revised in the same manner.◆The application document presently says in item III-1 (Apart from basic information, will information obtained from other studies before conducting the research be used?) that information from other studies will not be used. Since the study will use data from other studies, however, the relevant item should be changed to indicate that such information will be used, and any relevant information should be provided.

*The above Research Protocol was approved after confirmation that the relevant modifications were made properly.
