**RERF's Invited Session**

Thursday, August 30, 2012

Invited Session # 11: EXPOSURE RECONSTRUCTION AND EXPOSURE UNCERTAINTY IN EPIDEMIOLOGICAL STUDIES OF RADIATION HEALTH EFFECTS

16:15-16:40: Dan Stram, USC, "A statistical approach to using biodosimeters that may have a direct causal relation to outcome in radiation dose uncertainty problems."

16:40-17:05: C. Y. Wang, FHCRC, "A functional approach to dose error using biodosimetry data."

17:05-17:30: Kazutaka Doi, NIRS, "Extensions to the regression calibration and substitution approach to mitigating the impact of dosimetric uncertainty on risk regression."

17:30-17:55: Discussant: Harry Cullings, RERF

17:55-18:00: General discussion and questions
