演 題 : 「多変量分散分析と判別分析における高次元データ解析」
Title : “High-dimensional data analysis in MANOVA and discriminant analysis”

要 約 :

Summary:

In recent years, the analysis of high-dimensional data became important by the progress of the computer. For example, there are stock prices data or gene data as high-dimensional data. To analyze these data, the theory in the high-dimensional data was necessary. In this report, we introduce the high-dimensional theory in each multivariate analysis. In particular, we announce MANOVA and discriminant analysis for the high-dimensional data in detail.
